IRISH COBBLER.

Northern Grown Seed Potatoes

In Barrels of 165 lbs. each.

Grown Especially for Seed.

For many years we have made a specialty of supplying our trade with Northern Grown Seed Potatoes, and have enjoyed a largely increased trade from year to year. This we attribute to the fact, that our stock is especially grown for seed, by experienced growers in the cold North East, and being pure and true to name, produces a much larger yield, and potatoes of a much finer quality than the Home grown and Western stocks, usually sold in the open market for seed purposes. Each barrel contains 165 lbs. of full size tubers.

EARLY VARIETIES

Scott's Extra Early

This new variety has a white skin, is large, plump, smooth and handsome, matures two weeks earlier than Early Rose. It is a heavy yielder, an excellent cooker, and a good keeper. Prices:—1 Peck, \$1.00; ½ Bushel, \$1.75; 1 Bushel, \$3.00; 1 Barrel, \$7.00.

MARKET GARDENERS' SEED PRICE LIST

To Our Customers:

In presenting our Annual Seed Price List for another season, we take this opportunity of expressing our appreciation of your generous patronage of the past year.

Although the season of 1907 proved to be extremely unfavorable for the proper maturing of many varieties of Seeds—especially Peas, Beans and Corn—we have secured the best stock possible from the most reliable and experienced growers and have made our prices as low as possible, considering the quality of Seeds we offer.

Agricultural Implements.

Farm, Garden and Poultry Supplies.

Under the above title, we have issued a large and complete catalogue of the latest improved Garden and Farm Implements, Fertilizers, Poultry Supplies, Specialties, etc.—in fact, everything necessary to the well equipped Farm, Market Garden and Poultry Yard. It will be mailed free on request. Don't fail to ask for it.

Mail Orders.

Mail orders, entrusted to us, will receive our special attention, and customers can depend on their prompt and careful execution.

Our aim is to supply the wants of the trade in our different lines, and all inquiries will be appreciated and promptly answered.

Very respectfully yours,

I. W. SCOTT & CO.

VEGETABLE SEEDS.

SEEDS BY MAIL—Postage is 8 cents per pound. For Peas, Beans and Corn, add 15 cents per quart to prices quoted.

REMITTANCES can be made by postal money order, bank draft, registered letter, express company's money order, or by express. Amounts less than two dollars may be remitted in postage stamps.

SHIPPING INSTRUCTIONS—When goods are to be shipped by freight or express, give plain shipping instructions. Otherwise we use our own judgment in this matter.

GUARANTEE—Seeds of the best quality are apt to fail, through improper treatment, by sowing the seed too deep or too shallow, in too wet or too dry soil. They differ greatly as to temperature required for germination. Some will germinate rapidly at a certain temperature, while others, if sown under the same conditions, are apt to decay. The young plants are liable to various accidents; cold or dry air may check their growth or destroy them. Insects above and below the ground may attack them, and a great many other contingencies may arise to prevent the best seeds from giving satisfaction, and for all these reasons it is impractical to *Guarantee Seeds*. We give no warranty, expressed or implied, as to description, quality, productiveness, or any other matter, of any seeds we send out, and will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they are at once to be returned.

Prices subject to change without notice. Seeds in papers, 5 cents each, except Cauliflower; for prices on this, see under head of Cauliflower.

Half bushels will be charged at bushel rates; half pecks at peck rates; half pounds at pound rates. Less than half pecks at quart rates; less than quarter pounds at ounce rates.

**GIANT STRINGLESS,
GREEN POD.**

BRADON 75

GIANT STRINGLESS GREEN POD.

Giant Stringless Green Pod is a round podded bush bean of very fine quality. The pod is full of meat and absolutely stringless even when large enough to shell. The quality is unsurpassed.

ROUND POD KIDNEY WAX.

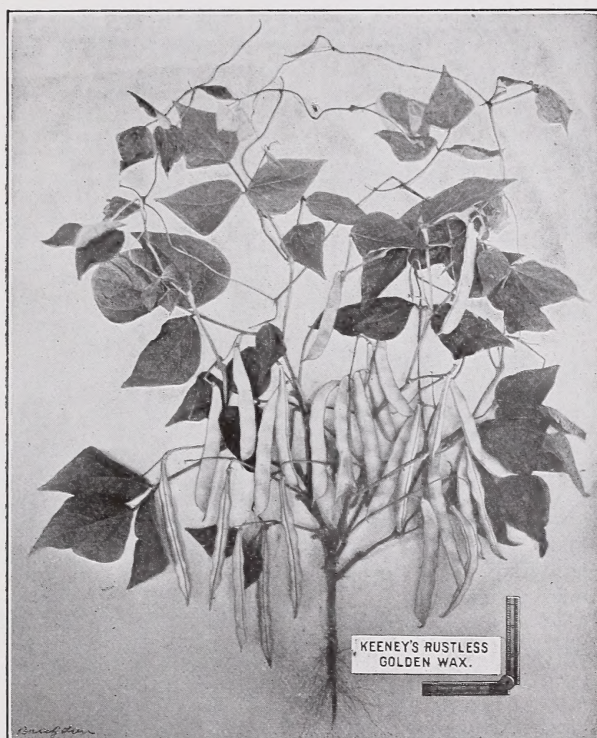

BRADON 76

ROUND POD KIDNEY WAX.

Round Pod Kidney Wax is one of the few Wax Beans combining productiveness, hardiness, beautiful appearance and superfine quality. It is a handsome yellow brittle pod and perfectly stringless at all stages of growth. Not liable to rust.

BEANS.**DWARF WAX PODDED.**

Three quarts of Seed to 100 yards of row. $1\frac{1}{2}$ bushels to the acre.

KEENEY'S RUSTLESS GOLDEN WAX.

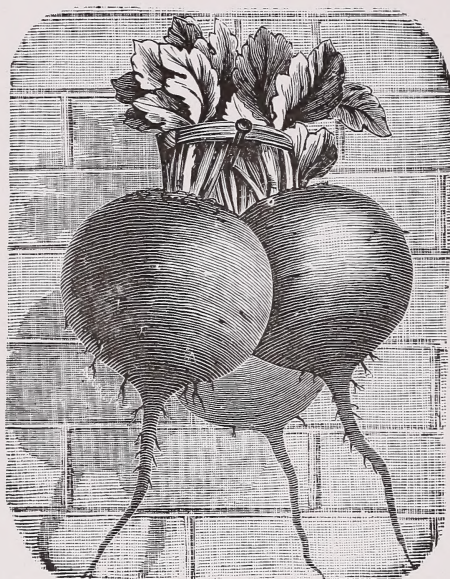

Keeney's Rustless Golden Wax is the most prolific flat wax bean known to the trade, and the only one that does not rust in unfavorable seasons. The pod is a rich yellow color, is meaty, of fine quality and perfectly stringless.

It sends out a tendril when in blossom but this soon disappears and it is practically a bush bean thereafter. One of the best sorts in cultivation.

Scott's Early Perfection Sugar Corn.

A variety of superior quality and very productive. Matures five or six days later than Early Cory, but is of much better quality and produces ears from eight to twelve inches long. Very sweet and tender. Grows from five to seven feet high and smuts less than any other early variety. We recommend it for early, medium or late planting. It stood the cold and unfavorable season of 1907 better than other varieties, grew and matured good crops where other varieties failed. It is a good sort for late planting, as it is very productive and matures quicker than the late varieties.

FLOWER SEEDS.

Sweet Flowering Peas.

EVERY ONE WHO CULTIVATES FLOWERS SHOULD
PLANT SWEET PEAS.

The Sweet Pea is one of the most popular flowers in cultivation and numbers among its enthusiastic admirers thousands of skilful cultivators. It is a free flowering climber, and considered one of the best annuals that enrich the flower garden.

Early in spring make a trench about six inches deep, in rich, mellow soil, so arranged that no water can stand in it, and plant the seed in the bottom, taking care not to cover it more than two inches. When the plants are about five inches high, fill up the trench and furnish some support for the vines to run upon. The flowers should be picked before they form pods, or the plants will soon stop flowering.
